

Development Mock Summary

May 8, 2026 4 min read

TL;DR

Mock mode is active, so this summary is generated locally to validate all summary UI states. Visit [Example](#) for a safe link test and *visual emphasis*.

KEY POINTS

- **Typography:** Headings, body text, emphasis, and spacing scale are visible.
- **Links:** Hover, visited, and focus styling can be tested safely.
- **Nested lists:** This item contains a sub-list.
 - Nested bullet one
 - Nested bullet two

STYLE COVERAGE

This section exists specifically to validate **h2 styling** in development mock mode.

Ordered Checklist

Generate summary in mock mode.

Switch light and dark theme.

Verify responsive behavior on small width.

Inline Content Samples

Use regenerate true when testing repeated runs. This line checks inline **bold**, *italic*, and link color: [MDN](#).

Design should feel calm, readable, and consistent with the rest of the app.

Summary.AI Mock Note

Code Block

```
const options = {
  format: "bullet-point",
  length: "medium",
  language: "english",
};
```
